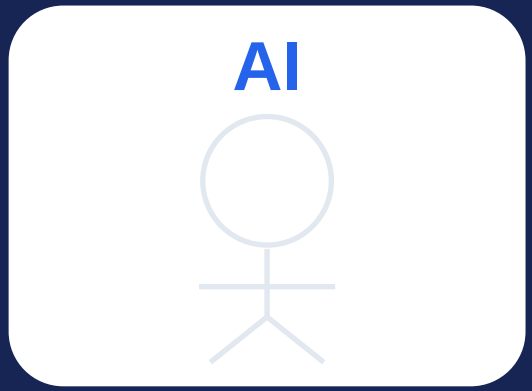
AI-POWERED INTERVIEW AGENT

Intelligent • Interactive • Automated

- Automated interview practice
- Role-based question generation
- AI response analysis
- Instant performance feedback



ARTIFICIAL INTELLIGENCE | AUTOMATED INTERVIEW SYSTEM

EXISTING SYSTEM VS PROPOSED SYSTEM

A simpler, faster and more consistent interview experience

EXISTING SYSTEM

- Manual interviews
- Interviewer required
- Fixed questions
- Time-consuming
- Subjective evaluation
- Delayed feedback

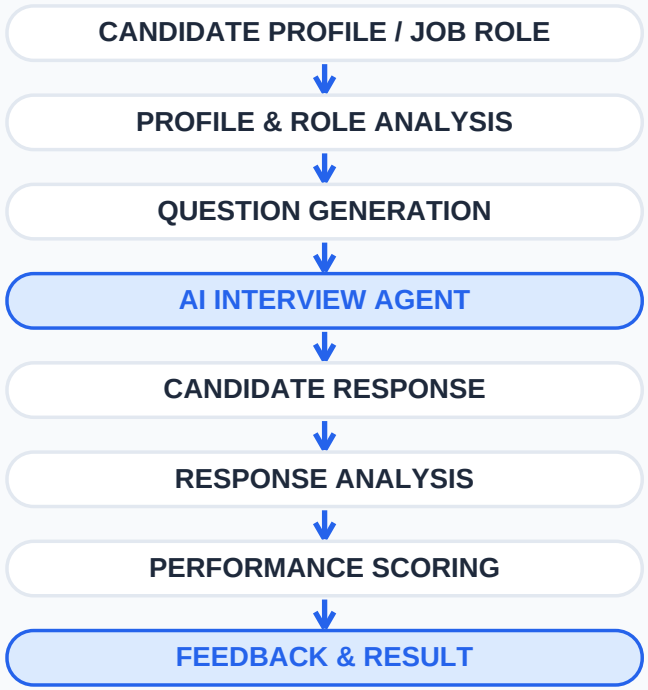
PROPOSED SYSTEM

- AI-powered interviews
- Available anytime
- Dynamic questions
- Automated process
- Consistent evaluation
- Instant feedback

MANUAL → AI-POWERED

SYSTEM ARCHITECTURE

End-to-end flow of the AI interview process



AI INTERVIEW ENGINE

Generate • Analyze • Evaluate

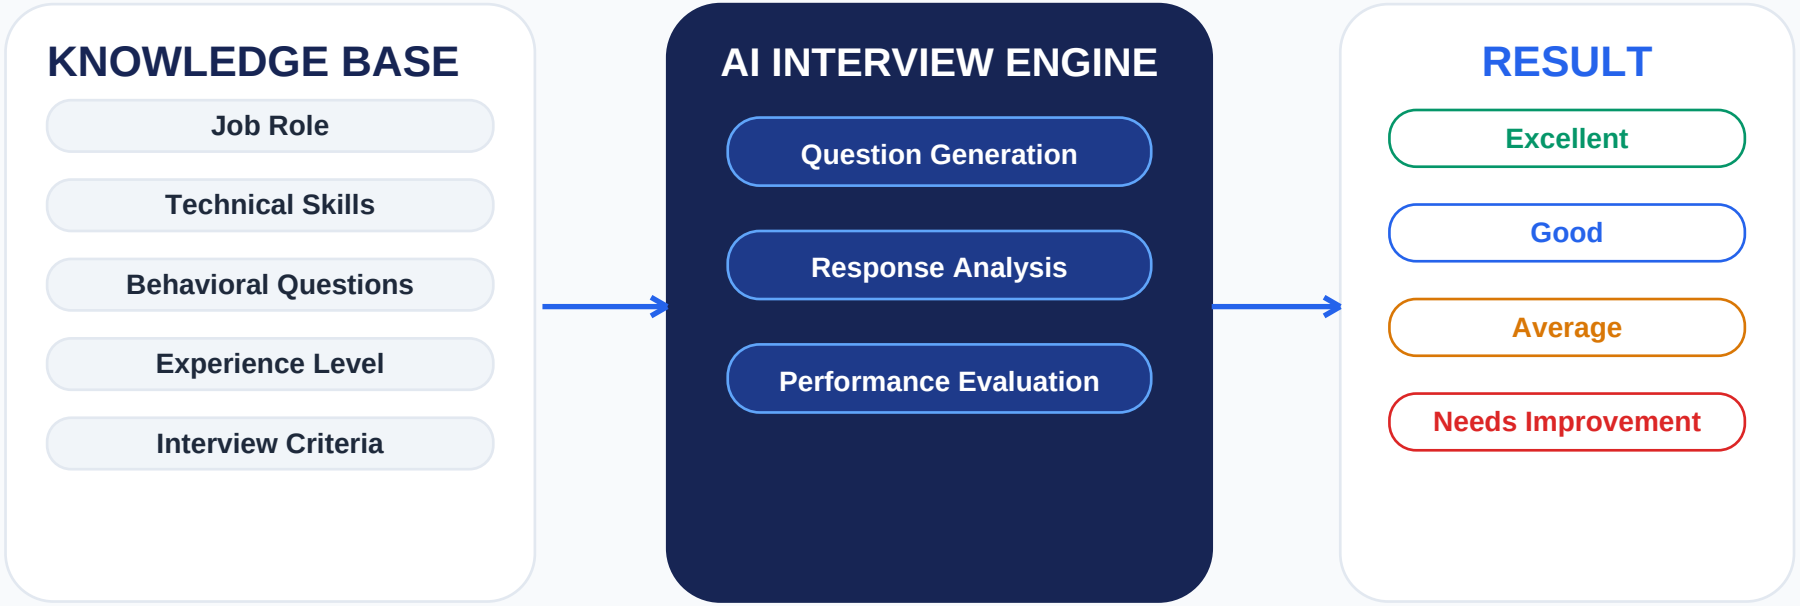
1. Generate
Role-based questions

2. Analyze
Understand candidate response

3. Evaluate
Score and give feedback

KNOWLEDGE BASE & AI REASONING

Inputs guide question generation and evaluation



AI-POWERED DECISION EXAMPLES

Simple IF–THEN reasoning for interview evaluation

01 TECHNICAL RESPONSE

IF

Correct concepts + relevant answer

THEN

Technical Score +3

REASON

Good technical understanding

02 COMMUNICATION

IF

Relevant + clear explanation

THEN

Communication Score +2

REASON

Effective communication

03 INCORRECT RESPONSE

IF

Incorrect or irrelevant answer

THEN

Performance Score –2

REASON

Needs improvement

QUESTION → RESPONSE → ANALYSIS → SCORE → FEEDBACK

CONCLUSION & FUTURE SCOPE

Key outcomes and possible enhancements

CONCLUSION

- Automates the interview process
- Generates role-based questions
- Analyzes candidate responses
- Evaluates key interview skills
- Provides instant feedback
- Creates a consistent experience

FUTURE SCOPE

- Voice-based interviews
- Resume analysis
- Multilingual support
- Real-time feedback
- Emotion analysis
- Web & mobile application
- Recruitment platform integration
- Personalized questions

PROFILE → QUESTION → INTERVIEW → ANALYSIS → SCORE → FEEDBACK
